Why it may help

Use the free tools at your own pace, with control over your information.

Before you begin

A free personal account is all you need. You can edit your own profile straight away; a practice is edited once you have confirmed it is yours.

Choose your task > Follow steps > Check status

Step by step

1. Open My Account and register with your own email and a password of at least 12 characters. Your sign-in email is never shown on your public profile.

2. Open the link we email you to confirm it is you. That is the only verification step.

3. You stay signed in for 30 days on the same device. Individual professionals and practice owners do not need an authenticator app.

4. Forgot your password? On the sign-in page choose password recovery and we email you a secure link.

5. Sign out when you use a shared device. Never send your password or a sign-in link to anyone, including support.

What to expect

What you enter is saved for you, and each tool shows whether it is public. Reading this guide changes nothing.

If something is not working

A sign-in link expires after 15 minutes and works once. Ask for a new one from the sign-in page.
