FIND A LOCAL PROVIDER

Help patients find everything you actually offer

Choose accurate categories in ordinary language without changing your credentials.

For: Professionals and location managers

Approved guide | Revision 2 | Reviewed 2026-11-14

Why it may help

Use the free tools at your own pace, with control over your information.

Before you begin

A free personal account is all you need. You can edit your own profile straight away; a practice is edited once you have confirmed it is yours.

Choose your task > Follow steps > Check status

Step by step

1. Select the profile or location that actually offers the care. Choose your clinical field and main service. This does not establish professional licensure or a board specialty.

2. Select additional services, patient age groups, care arrangements and payment models. Add the geography you genuinely serve.

3. Ask for suggestions. Your main work comes first and secondary services follow. Reorder, remove or add choices before accepting.

4. Confirm that the choices describe your actual work and choose Save my categories. They are live at once and your listed services follow them. Repeat separately for other locations.

What to expect

What you enter is saved for you, and each tool shows whether it is public. Reading this guide changes nothing.

If something is not working

A missing category can be sent as a help question. Choosing a category cannot create a credential or change Google Business Profile. Categories are shown as supplied by you, not independently verified.
