Why it may help

Use the free tools at your own pace, with control over your information.

Before you begin

A free personal account is all you need. You can edit your own profile straight away; a practice is edited once you have confirmed it is yours.

Choose your task > Follow steps > Check status

Step by step

1. Choose your profile in Profile Studio and open Community.

2. Choose an announcement, event, favorite place, charity, news or resource entry, and write why it matters to you.

3. For outside information include its source and HTTPS link. Confirm rights and consent, and any relationship with a place or organization you name. Do not imply an organization endorses you.

4. Set an expiration date if it applies, then choose Publish. PAL reads the post and it goes live right away. If something needs changing, PAL tells you what and nothing is changed. Turn on Show community content for posts to appear, and use the owner controls to hide one.

What to expect

What you enter is saved for you, and each tool shows whether it is public. Reading this guide changes nothing.

If something is not working

If PAL does not pass a post, edit the words it mentions and choose Publish again. If PAL is busy, nothing is changed; try again in a moment. Do not copy a newspaper article or list a place without consent.
