Why it may help

Use the free tools at your own pace, with control over your information.

Before you begin

A free personal account is all you need. You can edit your own profile straight away; a practice is edited once you have confirmed it is yours.

Choose your task > Follow steps > Check status

Step by step

1. Open your profile setup and go to Make it yours.

2. Choose a photo from your phone or computer, or drop it into the photo area. Preview it, choose original, square or landscape, then select Upload Photo. Use Move earlier or Move later to arrange photos; captions are optional.

3. Confirm you may share the picture and that it shows no patient information.

4. Choose the photos to use. They are saved and appear on your public listing and website automatically. Video links remain available in the full editor.

What to expect

What you enter is saved for you, and each tool shows whether it is public. Reading this guide changes nothing.

If something is not working

Use JPG, PNG or WebP, up to eight photos. Remove a photo from your selection to take it off your listing and website.
