FIND A LOCAL PROVIDER

Explore a clinical preceptorship safely

Understand the separate reviews needed for a supervised clinical relationship.

For: Students, preceptors and authorized hosts

Approved guide | Revision 1 | Reviewed 2026-11-05

Why it may help

Use the free tools at your own pace, with control over your information.

Before you begin

A free personal account is all you need. You can edit your own profile straight away; a practice is edited once you have confirmed it is yours.

Choose your task > Follow steps > Check status

Step by step

1. Open Preceptorships from the career workspace where available. Staging examples are fictional.

2. A prospective preceptor supplies current professional evidence, scope and host information. A host confirms authority separately.

3. Wait for the required independent scope and credential review before a rotation is eligible.

Optional, free help. Keep patient details, passwords and private contacts out of help requests.

4. Review any introduction permission before accepting it. Consent is recipient-specific and may be revoked; no live introductions are sent in staging.

What to expect

What you enter is saved for you, and each tool shows whether it is public. Reading this guide changes nothing.

If something is not working

A website listing or career interest alone is not a preceptorship approval. School arrangements and supervision requirements still need appropriate review.
