Why it may help

Use the free tools at your own pace, with control over your information.

Before you begin

A free personal account is all you need. You can edit your own profile straight away; a practice is edited once you have confirmed it is yours.

Choose your task > Follow steps > Check status

Step by step

1. Open the content library in Website Studio and select your profile. A separate purchased website is not required.

2. Choose article, recipe, video or another supported type. Add your title, summary and text. Recipes need ingredients and preparation steps; videos need an HTTPS link and source name.

3. Say whether the work is your own or used with permission, and confirm it contains no patient information. Add descriptive alternative text for an image.

4. Save a private draft to come back to, or choose Publish. Your own work goes live at once. Work used with permission is read by PAL first and goes live in the same step; if something needs changing, PAL tells you what and nothing public changes.

What to expect

What you enter is saved for you, and each tool shows whether it is public. Reading this guide changes nothing.

If something is not working

If Publish reports a missing source, permission note or recipe step, complete that field. If PAL is busy, your item is kept as a private draft; choose Publish again in a moment. Nothing appears publicly until your profile is public.
