FIND A LOCAL PROVIDER

Describe your education and training

Keep a personal portfolio while accurately distinguishing current and intended credentials.

For: Students and professionals in training

Approved guide | Revision 2 | Reviewed 2026-11-05

Next review: 2027-02-05

Why it may help

Use the free tools at your own pace, with control over your information.

Before you begin

A free personal account is all you need. You can edit your own profile straight away; a practice is edited once you have confirmed it is yours.

Choose your task > Follow steps > Check status

Step by step

1. Open the education controls in My Career Opportunities. Supply your actual program, institution and intended credential.

2. Add your anticipated graduation date and interests after training. Never describe an intended credential as already earned.

3. Save privately. If you choose to share an education article, review its contents and submit it for independent review.

4. Keep your account and original content as you graduate or change affiliations. No NPI is required for a student account. An NP-student verification badge requires current RN licensure and separate NP-program enrollment evidence bound to your identity. Missing source connections remain pending. New licensure requires its own credential check.

What to expect

What you enter is saved for you, and each tool shows whether it is public. Reading this guide changes nothing.

If something is not working

A student portfolio does not make you eligible for independent patient-care search as a licensed NP or other intended profession.
