FIND A LOCAL PROVIDER

Personalize your professional website

Build a free website from validated sections and your approved directory information.

For: Owners and authorized editors

Approved guide | Revision 7 | Reviewed 2026-11-14

Why it may help

Use the free tools at your own pace, with control over your information.

Before you begin

A free personal account is all you need. You can edit your own profile straight away; a practice is edited once you have confirmed it is yours.

Choose your task > Follow steps > Check status

Step by step

1. Your free website is created automatically from your listing. Open Website Studio from My Dashboard to change how it looks.

2. Choose a template and color. In Content, edit your words and choose photos. Add an optional FAQ and one custom section; hide or reorder sections.

3. Changes save automatically and appear on your live website. Open Full Preview shows the whole page.

4. Hide my website takes only the website out of public view. Show my website brings it back. Your directory listing is not affected.

5. If another tab saved a newer version, load it before continuing. Your current edits are not overwritten.

6. A website with a real introduction can be found in search engines, so a few sentences about you are worth adding.

What to expect

What you enter is saved for you, and each tool shows whether it is public. Reading this guide changes nothing.

If something is not working

A section stays hidden until you add something to it. Custom domains and paid assistants are not active yet.
